STORMWATER
NEW SOUTH WALES

Who we are

Stormwater NSW is the preeminent professional urban water management association in the state. We are a peak industry association with membership including the majority of councils in the Greater Sydney Region, as well as numerous consulting and manufacturing companies.

We have **over 500 corporate, institutional, government and individual members** drawn from the engineering, planning, landscape architecture, environmental management, economic management, water resource management, education and community engagement sectors.

Stormwater NSW is **supported by the national association Stormwater Australia** and a strong network of state associations in Queensland, Victoria, South Australia and Western Australia.

Our aim

To enable local practitioners and the broader community to learn about best practice and industry leading stormwater management and stormwater quality and quantity technologies.

Our purpose

To support and be a positive influence on the growth and application of sustainable water management practices across NSW.

WELCOME FROM THE PRESIDENTS

Welcome to the Stormwater NSW 2016/17 Annual Report.

The past year has been a period of consolidation and development for the Stormwater NSW committee. We started the 2016/17 financial year by reorganising the structure and meetings of the committee, and developing a three-year business plan.

Our business plan for 2016/17 – 2020 outlines our commitment to delivering projects and activities that focus on offering better value for our members, whilst raising the profile of the stormwater industry.

To do this successfully, we made changes to how we operate. Instead of full group committee meetings taking place every month, these meetings now take place every second month, with sub-committee meetings held on the alternate months to implement the business plan. The two sub-committees are made up of half the full group committee and are chaired by each of the Co-Vice Presidents.

The Conference and Events (CandE) sub-committee works through business plan deliverables associated with seminars, technical tours and conferences. While the BMAC sub-committee focuses on deliverables associated with business-planning, marketing, advocacy and communication.

During 2016/17 the Stormwater NSW Committee has maintained its emphasis on implementing a range of services to its members. These services provide members with exceptional opportunities for development of their professional careers through networking, improved access to industry events and the latest best management practices in the field.

Key successes have been the build of our new Stormwater NSW website, the National Conference, and our local seminars and technical tours.

Further successes and highlights are outlined in this report. Additionally, Stormwater NSW continues to actively work with the national body across a range of initiatives.

Financially, we are in a sound position and continue to meet our statutory obligations. This position has allowed us to part-fund two members during the 2016/17 period to undertake a water leadership program at the International WaterCentre.

Looking ahead to our next AGM in September we'll see both co-presidents step down. This will be an exciting time for new leaders to continue building on strong foundations, expanding the growth and application of sustainable water management practices across the state, and exploring ways to connect with the broader community.

In September 2017, Stormwater NSW will host its conference in Newcastle and later in 2018 we'll see the National Stormwater Conference held in Sydney. We look forward to seeing you there!

Lastly, we would like to say a big thank you to all our Stormwater NSW committee members for their tireless efforts in making 2016/17 a year to remember. The hours people volunteer to the committee demonstrates the importance of the industry, and our achievements are because of their efforts.

Richard McManus **Keysha Milenkovic**

HIGHLIGHTS AND ACHIEVEMENTS

AWARDS

Stormwater NSW 2016 Awards for Excellence

The 2016 Stormwater NSW Awards for Excellence were held on 6 July at L'Aqua, Cockle Bay Wharf in Sydney. An exciting selection of award entries made for a great night.

Awards were presented to the following winners under four separate categories:

Excellence in Infrastructure

Awarded to **Cardno Pty Ltd and Scentre Group** for their Managing Flooding of Warringah Mall in Brookvale Project

Excellence in Integrated Stormwater Design

Awarded to **Turf Design Studio and Environmental Partnership with Alluvium, Turpin + Crawford Studio, Dragonfly Environmental and Partridge**, **Commissioned by City of Sydney** for their Sydney Park Water Re-Use Project

Excellence in Policy or Education

Awarded to **City of Canterbury Bankstown** for their Stormwater Audit and Education Program; and

Excellence in Research and Innovation

Awarded to **WaterNSW, Centre for Aquatic Pollution Identification and Management, Blue Mountains City Council and Wollondilly Shire Council** for their Stormwater Pollution Investigation Pilot Project.

Stormwater National 2016 Awards for Excellence

As part of the 2016 Stormwater National Conference held on the Gold Coast in August/September 2016, the 2015 and 2016 Stormwater NSW Awards of Excellence winners continued their success by taking out four of the six national categories.

Congratulations to our NSW National winners listed below:

Excellence in Asset Management

Awarded to **City of Canterbury Bankstown, Optimal Stormwater and Bell Environmental** for their Pollution Control Device Cleaning Tender – The Next Generation

Excellence in Policy or Education

Awarded to **City of Canterbury Bankstown** for their Stormwater Audit and Education Program

Excellence in Research and Innovation

Awarded to **Alluvium Consulting Australia and Blue Mountains City Council** for their Blue Mountains Cultural Centre Green Roof Treatment and Reuse System

Excellence in Strategic or Master Planning

Awarded to **Blacktown City Council and Footprint Sustainable Engineering** for their Business Case for Precinct Scale Stormwater Treatment in the Established Areas of Blacktown LGA.

SEMINAR

Stormwater NSW Seminar - Planning by Design: Creating a Vision for Sydney

In February 2017 Stormwater NSW partnered with Splash, a recently established capacity building organisation, to deliver a forum titled **Planning by Design: Creating a Vision for Sydney**.

At this time various government departments had been working towards building a vision and planning for the future of Greater Sydney, and the forum was a great opportunity to hear from these departments.

The forum brought together speakers from the Greater Sydney Commission, the NSW Government Architects Office and the Metropolitan Water Directorate, to present some of the key directions and strategic planning of these organisations.

Greg Joblin and Andrew Jordan of the Greater Sydney Commission spoke about the recent release of the six Draft District Plans. Barbara Schaffer of the Government's Architect Office presented on the governments 'Better Placed: A Design Led Approach, Developing an Architecture and Design Policy for NSW'. Reid McNamara of the Metropolitan Water Directorate spoke about the pending release of the Metropolitan Water Plan and key components of the Water Smart Cities Program. Lindsey Beck of Lindsey B finished the forum with an introduction to the Water Sensitive City Index developed by the Centre for Cooperative Research for Water Sensitive Cities.

The forum was well attended with over 72 registrations representing more than 49 organisations. At the completion of the forum participants were invited to stay and network over canapes and drinks to welcome in 2017.

TECHNICAL TOUR

Stormwater NSW Technical Tour - Illawarra

In April 2017, Stormwater NSW hosted a very successful technical tour to the Illawarra region, south of Sydney. The tour attracted 30 delegates from across the government, corporate and consulting sectors.

The Illawarra region was chosen for its diverse landscape and the variety of challenges it brings to stormwater management.

The tour had two elements - the first focused on key operational and maintenance challenges posed by stormwater management infrastructure, while the second focused on the compelling story of Lake Illawarra and how it provides important lessons for coastal communities throughout NSW.

The tour involved a series of presentations by Jason Cooper of Wollongong City Council and Dr Jocelyn Della-Cruz and Danny Wiecek from the Office of Environment and Heritage.

Feedback from the technical tour has been overwhelmingly positive.

"The thing with these technical tours is that you don't just learn from the presentations. You also learn from focused discussions with industry colleagues"

"I'm extremely confident that everyone who joined us for the tour will become better practitioners and that to me is a fantastic bottom line."

- Tour organiser, Russell Beatty

ADVOCACY

In 2016/17, Stormwater NSW has actively advocated for improved stormwater outcomes in NSW including:

- Lobbying IPART to keep Sydney Water expenditure for waterway health in its 2016/2020 price-path
- Making representations to IPART to ensure that water quality treatment systems are considered essential infrastructure for Alex Avenue Growth Centre[1], which secured ongoing funding for stormwater treatment measures through Section 94 (developer) contributions for new developments in early 2017
- Responding to UrbanGrowth NSW's new stormwater quality targets (2017); and
- Making representation to the Metropolitan Water Directorate on Urban Water Regulation in NSW.

It is noteworthy that Stormwater NSW has also supported Stormwater Australia, who have led discussions with members of Federal Parliament advocating the importance of stormwater management and treatment. As a result, Senator Nick Xenophon is calling for additional funding to be made available for stormwater management. We look forward to working with Stormwater Australia and seeing the outcomes at a federal level.

[1] Based on the Practice Note, we (IPART had) interpreted such infrastructure (rain gardens and other stormwater quality improvement devices) to be predominantly environmental in nature. On this basis, we considered that all secondary and tertiary facilities for water quality treatment should be regarded as 'non-essential'. We have since reconsidered this issue based on information provided to us by Stormwater NSW about how this infrastructure is integral to councils in the Growth Centres achieving water quality targets.

STORMWATER MANAGEMENT SERVICE CHARGE

Stormwater NSW has been actively advocating to see changes made to the **Stormwater Management Services Charge (SMSC)** (also known as the Stormwater Levy), to increase funding for Councils for stormwater maintenance and other core sustainable stormwater related works.

The current SMSC structure dates back to 2005, when Stormwater NSW worked with the NSW EPA to change legislation and regulations, imparting to councils the power to impose a SMSC to properties.

For the past 12 years the SMSC has not increased, as it's not linked with Consumer Price Index (CPI). This has left councils with limited funds to meet stormwater operational requirements as our cities and towns grow.

Stormwater NSW has reviewed the situation, and put a submission to the Minister for Local Government and Minister for the Environment, in an effort to increase funding and have it linked with CPI for the maintenance of treatment solutions and supplementary works. By increasing councils' capacity to deliver their core business commitments for stormwater, we hope to achieve greatly enhanced environmental outcomes for the future.

As at July 2017, Stormwater NSW is awaiting ministerial advice, however we are confident of a positive outcome in the near future.

CAPACITY BUILDING:

International WaterCentre Leadership Program

Two Stormwater NSW members Nerida Taylor and Kristy Good were successful in attaining part scholarships funded by Stormwater NSW, to undertake the International WaterCentre's Leadership Program. This program is designed to build the capacity of water leaders, and balances academia with real-world approaches to leadership.

This nine-month program comes highly recommended by Nerida and Kristy who have been working with industry colleagues, sharing experiences and applying knowledge gained from the program. In addition, new relationships have been developed as part of a mentor and mentee pilot program the two are leading and trialling.

The aim of this work is to develop and provide mentor and mentee opportunities for Stormwater NSW members, and those new to leadership and the water sector.

EXPANDING ACTIVE STORMWATER NSW MEMBERSHIP BASE

As part of our drive to improve stormwater management across NSW, Stormwater NSW has been reaching out to councils that are not currently members, and so do not have access to the industry knowledge, technical developments, training, technical tours and conferences provided by Stormwater NSW. As councils invest in the design, installation and maintenance of the majority of NSW's stormwater assets, it is vital that they have the best knowledge, tools and support.

The benefits of membership, and advances Stormwater NSW has made for the industry, with regard to securing additional ongoing funding for implementation and maintenance of stormwater systems has been highlighted.

All councils within NSW that are not currently members of Stormwater NSW, have been approached this year and are encouraged to become Stormwater NSW members. The broader our support base, the stronger our influence becomes.

We look forward to sharing our knowledge and experience to assist with improved management of stormwater across NSW.

NEW WEBSITE

As part of our business plan, Stormwater NSW identified a need to better engage with our members online, and to become a hub of technical resources for the stormwater industry.

To facilitate these objectives, we embarked on a process to review our current website, and to identify what was needed in order to improve the way in which we connect and provide online resources to our members. The outcome of the review was a scope and brief for a new website with improved functionality and flexibility.

Over the past year, we have been working to bring our members and industry colleagues a modern-looking website that provides the latest industry news, events, resources and useful document links to assist in effective and sustainable stormwater management.

The new website will also feature an easy-to-use content management system, to enable timely updating of information and website content as it becomes available.

Our Stormwater NSW members will have exclusive access to past conference papers and presentations, simply by logging in as a member. Additional resources will be made available after our September NSW Stormwater Conference, so keep an eye open for more exciting news and content as we build on this throughout 2017/18.

TREASURER'S REPORT

The Committee is of the view that Stormwater NSW is sound financially and continues to successfully trade and meet its statutory obligations.

Since FY11 GEMS have provided secretariat services including financial services to Stormwater NSW. These services continued in FY17 and continue to be provided in a highly professional manner. GEMS is commended for their timely, detailed and accurate financial reporting. The accounts have been audited and the auditor's report is included in this 2016/17 Annual Report.

Over the last ten years, Stormwater NSW's equity increased until FY10, then decreased in FY11 and then progressively increased each subsequent year to its highest level in FY16. However in FY17 our equity declined due in part to nil nett income received from events, seminars and the conference and significant conference and event expenses, consultant fees and Stormwater NSW's financial support of two part scholarship for two Stormwater NSW members to undertake the International WaterCentre Leadership Program.

It is noted that two Stormwater Australia quarterly levy invoices were not received during FY17 and it is expected that these will be received early in FY18. At the same time surplus income from the 2016 National Conference held on 29 August – 2 September 2016 was not distributed to Stormwater NSW and other state associations in FY17. It is expected that this income will be received in the first quarter of FY18.

The major sources of income disclose the following trends:

- Individual memberships for FY17 declined slightly in comparison to FY16;
- Corporate memberships for FY17 increased in comparison to FY16;
- Overall the membership income increased by $8,379 (19.7% increase).
- Revenue interest on Stormwater NSW's term deposits was the next largest source of income for FY17;
- Stormwater NSW did not receive any grants in FY17.

The growth in membership fees as a major source of income reflects the level of effort expended by GEMS, and the timely manner in which membership renewals have been issued and the effort expended in following up renewals. Another trend has been the modest income from conferences and events as a major source of income, which is a reflection of the challenges in attracting attendees to our conference and events, in an increasingly crowded calendar and a reflection of financial constraints faced by some members.

The major expenses disclose the following trends:

- The National Levy remains a significant ongoing expense;
- The cost of secretariat services were slightly lower than FY16.

The Stormwater NSW financial reserves include two separate term deposits as follows.

- Account 50256892 - Matured on 22nd June 2017 at a total of $37,658.
- Account 50248913 - Matured on 17th June 2017 at a total of $37,202.

The financial challenges for Stormwater NSW in the coming financial year include:

- Through demonstrated benefits continue to increase our membership;
- To grow Stormwater NSW seminars as an ongoing source of income;
- In FY18 the Stormwater NSW conference will be held on 6-8 September 2017 in Newcastle – it is important that the annual conference be financially successful to generate income to assist in the funding a number of planned initiatives; and
- Stormwater NSW is planning to fund several initiatives in FY18 which means that it may further draw down its financial reserves in a controlled and sustainable manner in FY18. This is on the basis that these initiatives will support the delivery of valued services to our members and will further enhance the standing of Stormwater NSW.

Dr Brett C Phillips

Treasurer, Stormwater Industry Association of NSW Inc.

NOTES TO AND FORMING PART OF THE FINANCIAL ACCOUNTS FOR THE YEAR ENDED 30 JUNE 2017

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

The accounts have been prepared in accordance with relevant Australian Accounting Standards and the disclosure requirements of the Associations Incorporation Act 1981. The accounts of the Association have been prepared on an accrual basis, with the exception of membership and conference income, which are recorded as income when billed, and are in accordance with conventional historical cost principles.

The Association is not a reporting Association because, in the Committee's opinion, there is unlikely to exist users of the accounts who are dependent on general-purpose financial reports of the Association for information. These accounts are therefore a "Special Purpose Financial Report" prepared so as to comply with the requirements of the Constitution and to provide information required by the members.

The following is a summary of the significant accounting policies, adopted by the Association in the preparation of the accounts, which have been consistently applied unless otherwise stated.

(a) Income tax
The Association is exempt from paying income tax under Section 23(g) of the Income Tax Assessment Act.

(b) Property, Plant & Equipment (PPE)
Plant and equipment are carried at cost less, where applicable, any accumulated depreciation. The depreciable amount of all PPE is depreciated over the useful lives of the assets to the association commencing from the time the asset is held ready for use.

(c) Cash and cash equivalent
Cash and cash equivalents includes cash on hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of six months or less.

(d) Revenue
Revenue is measured at the fair value of the consideration received. All revenue is stated net of the amount of goods and services tax (GST).

(e) Goods and Services Tax (GST)
Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO). Receivables and payables are stated inclusive of the amount of GST receivable of payable. The net amount of GST recoverable from, or payable to, the ATO is included with other receivables or payables in the balance sheet.

2. LEVY PAYABLE TO NATIONAL STORMWATER INDUSTRY ASSOCIATION

In accordance with Clause 23 of the "Protocol for the linking of the SIA Associations", SIA (NSW) must forward an annual subsidy levy per membership to the National SIA Association based on the number of financial members registered each quarter.

3. CAPITAL COMMITMENTS

There were no contracts entered into for future capital expenditure in the current financial year.

4. CONTINGENT LIABILITY

No contingent liabilities existed as at 30 June 2017.

5. MORTGAGES, CHARGES AND SECURITIES

At 30 June 2017 there were no mortgages, charges, or securities of any description affecting any of the property.

6. EVENTS SUBSEQUENT TO BALANCE DATE

There are no items or events of a material or unusual nature that have occurred since 30 June 2017 which should be disclosed.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF THE STORMWATER INDUSTRY ASSOCIATION OF NSW

We have audited the accompanying financial report, being a special purpose financial report, of Stormwater Industry Association of NSW. (the "Association"), which comprises the balance sheet as at 30 June 2017, the income and expenditure statement for the year then ended and notes comprising a summary of significant accounting policies and other explanatory information.

Committee's Responsibility for the Financial Report
The committee of the association is responsible for the preparation and fair presentation of the financial report, and has determined that the basis of preparation described in Note 1 is appropriate to meet the requirements of the Associations Incorporation Act 2009 (NSW) and is appropriate to meet the needs of the members. The committee's responsibility also includes such internal control as the committee determines is necessary to enable the preparation and fair presentation of a financial report that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility
Our responsibility is to express an opinion of the financial report based on our audit. We have conducted our audit in accordance with Australian Auditing Standards. Those standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Association's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Association's internal control. An audit also includes evaluation the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the committee, as well as evaluating the overall presentation of the financial report.

The financial report has been prepared for the distribution to members for the purpose of fulfilling the committee's financial reporting under the Associations Incorporation Act 2009. We disclaim any assumption of responsibility for any reliance on this report or on the financial report to which it relates to any person other than the members, or for any purpose other than that for which it was prepared. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence
In conducting our audit, we have complied with the independence requirements of the Corporations Act 2001.

Basis for Qualified Auditor's Opinion
The nature of the activities of the incorporated entity is such that income received from membership, sponsorship and public events conducted during the year, representing a significant source of revenue for the Association, is recorded on a cash basis. The committee has determined that it is impracticable to establish control over the collection of cash sponsorships and public event receipts prior to their initial entry in the accounting records. Accordingly, we do not express an opinion on whether all receipts have been properly recognised.

Qualified Auditor's Opinion
Subject to the above reservation, in our opinion, the financial report presents fairly, in all material respects, the financial position of Stormwater Industry Association of NSW as at 30 June 2017 and the results of its operations for the year then ended in accordance with the Associations Incorporation Act 2009 (NSW).

Basis of Accounting
We draw attention to Note 1 to the financial report, which describes the basis of accounting. The financial report has been prepared to assist Stormwater Industry Association of NSW to meet the requirements of the Associations Incorporation Act 2009. As a result, the financial report may not be suitable for another purpose.

SECRETARIAT

GEMS Event Management Australia as secretariat for Stormwater NSW has continued to greatly assist the committee in improving its services. GEMS have provided support services to allow committee members to focus on business plan activities over this past year, and have assisted the committee by:

- Providing support for the bi-monthly committee meetings, managing association memberships and managing the financial accounts of the Association
- Secretariat for the State Conference and Awards
- Secretariat for the Technical Tours and Seminars; and
- Maintaining the website and managing correspondence.

Thank you to the GEMS team for all your hard work
